Founded in 2002, Dot5Hosting has built its success around our carefully put-together hosting package that meets the needs of all potential users, ranging from the home user through to the commerce business user. Their hosting solution has won many awards over the years.

They provide their customers with quality Web hosting at an affordable price—and support them with friendly, high-quality technical support. Their call center provides technical support to their customers 24x7, and they pride themselves on their quick-call response times, and their knowledgeable and courteous staff. They operate on the theory that if they don't look after their customers, someone else will.
